7	M3.1	Listening (BGK)	IT&Technology	Listen to the question of the English specialist and write the correct answer with ONE WORD ONLY: This device is a flat screen that you can hold in your hands; and it doesn't have a physical keyboard or buttons. To use it, you only need to touch on the screen with your fingers. You can swipe, tap, or pinch the screen to do different things. All the functions of a smartphone can be found on this device, but you are able to enjoy them with a better visual. Nowadays, it has become a convenient equipment because it is larger than a smartphone but smaller than a computer. Therefore it makes the device portable: you may take and use it anywhere, whether you're sitting on the couch or going on a trip, perfect for multiple purposes: discovering information, playing games, watching movies, taking pictures, etc. I think of it like a wonderful device that helps you do lots of cool things with just a touch! So my question is: What device is she talking about? (_ _ _ _ _)	Tablet	https://drive.google.com/drive/folders/1Ar1sdP-z6WkM2qtido_WIKxxZXbDk20a
